

## Keeping SAFE online

The internet can be a valuable tool for learning and we want you to get the most out of it. However, it's important that you keep safe when you are online. Here are some top tips for you to remember:

1. Never give out your personal details online
2. Never share your login details (usernames and passwords) with anyone
3. Never arrange to meet someone you have met online without your parents' permission and without your parents being present
4. Don't accept or open files from people you don't know
5. If you want to chat online then stick to *moderated* chatrooms as they are safer and remember that the people you meet online may not be who they say they are
6. Tell your parents/guardians if you feel uncomfortable, upset or threatened by anything you see online
7. The Web's a great resource for homework, but remember to use more than one site in research to get broad and balanced information, and ALWAYS reference your research sources.
